

Overview

Compliance and Best Practice Software, anywhere, anytime, in real time.

iAppraise™ is a risk-based, on-line audit and survey management tool enabling any organization to develop and schedule its entire auditing requirement, carry out audits on-line, and perform issue-tracking, reporting and post-audit analysis. With iAppraise™ you are no longer desk bound, you can now conduct audits at remote locations and import audit data without having to return to base.

Features

- Fully secure Web or Intranet based delivery
- Fully customizable checklist content
- Structured for best practice
- Interfaces with iMobility™ to provide mobile, Pocket PC access
- Eliminates the requirement to pre load audit data into your PDA before you leave the office

iAppraise™ enables you to:-

- Implement a global audit management system, with users all over the world having access to a centralized system
- Develop customized audits, inspections and surveys to cater for any compliance requirement, including safety, quality, project compliance, security, etc.
- Provide both internal and external auditors with an easy-to-use application that will streamline the auditing and reporting process and avoid duplication.
- Conduct audits at remote locations and import audit data without auditors having to return to base
- Improve management and control of the auditing function with built-in Planning and Scheduling wizards
- Improve the consistency, accuracy and timeliness of the data collection/reporting process
- Increase stakeholder value
- Monitor risk exposure in real time across multiple locations
- Give your compliance team the latest and most effective tools available
- Reduce costs and increase efficiency
