

Overview

Pocket PC Solutions for corporations on the move...

iMobility™ is a suite of Microsoft® Pocket PC based applications, which enable any organization to carry out inspections, audits and surveys at any location.

Our mobile solutions offer huge savings where audits and inspection activities are carried out externally. Reduced audit downtime, reduced administrative and reporting costs and convenience will provide significant rewards, however the most important benefit of our paperless auditing solutions is that they yield **business intelligence**. Management now have access to vital data about operational performance, risk exposure, compliance bottlenecks and trends.

Our Pocket PC software provides seamless integration with our compliance applications:

- **Pocket Appraise™** is used with our intranet or web based iAppraise™ software.
- **Pocket Auditor™** is used with our PC/LAN based iAudit™ software.

When mobility is the key - iMobility™ is the intelligent answer.

Pocket Appraise™

Pocket Appraise™ is a new Pocket PC program designed for mobile, paperless audits, inspections and surveys.

Using Web Services, users can connect directly to corporate data to download checklists for field inspections and audits. Then, **while disconnected**, responses to any number of checklists can be entered during the normal course of work.

Using dynamically generated, survey-like checklists, users respond to questions quickly and easily, and may use standard text resources to quickly enter observations and remarks.

Pocket Appraise™ is one of the first .NET Compact Framework applications in the world to successfully meet the Microsoft .NET Connected logo requirements.

Benefits

Pocket Appraise™ will deliver

- An easy-to-use Pocket PC program auditors can take with them to any location. Its convenience plus!
- Improve the consistency, accuracy and timeliness of the data collection/reporting process.
- Customized audits, inspections and surveys to cater for any compliance requirement, including safety, quality, project compliance, security, etc.
- Reduced operating costs arising from efficient audit and post audit reporting processes.
- Fewer accidents, better management of risk, and lower insurance premiums.

Pocket Appraise™ is provided under licence to registered users of iAppraise™.

Pocket Auditor™

Pocket Auditor™ is a Pocket PC based application which enables any organization to carry out inspections, audits and surveys at any location.

Pocket Auditor™ uses a database extracted from the host application (iAudit™) to generate audits in the field, using parameters entered by the user. Checklists, customized to the auditee, are dynamically generated.

This powerful feature alone will provide significant savings. With Pocket Auditor™, auditors can be sent to any auditing assignment without necessarily planning each audit in advance. It is just one of the many features designed to increase auditing efficiency and convenience.

Pocket Auditor™ also has the ability to generate Corrective Actions in the field, against any audit question. These are automatically uploaded with completed audits.

Benefits

Using Pocket Auditor™ means users can:

- Provide both internal and external auditors with an easy-to-use application they can take with them to audit or inspect any location.
- Improve the consistency, accuracy and timeliness of the data collection/reporting process.
- Develop customized audits, inspections and surveys to cater for any compliance requirement, including safety, quality, project compliance, security, etc.
- Reduce costs owing to the more efficient audit and post audit reporting processes, reduction in avoidable accidents, better management of risk, and lower insurance premiums.

Pocket Auditor™ is provided under licence to registered users of iAudit™.
